

LP-SPT TM

- Measures the voltage protection level of the lightning protection device
- Field portable, lightweight design weighs only 16 ounces
- Inherently safe circuitry protects personnel
- Can also be used to test MOV's, diodes and gas tubes

The innovative LP-SPTTM RF surge protection tester can test any lightning protection device or component to ensure its proper functioning and capability to protect critical and expensive RF equipment. Weighing only 16 ounces and powered by two 9 volt batteries, the ruggedized hand-held unit is completely portable making it ideal for field use. The LP-SPTTM unit has two terminals, N male and N female, to support testing of the most popular in line RF surge protection devices and can easily test surge protectors with any other interfaces by using commonly available RF adaptors. The slim LP-SPTTM unit comes complete with a heavy duty nylon carrying case, batteries, easy-to-follow instructions and a set of alligator clips to allow testing of other surge protection components such as MOV's, diodes and gas tubes.

• Size: 9.0" x 4.0" x 1.5"

Weight: 16 ouncesPower: Two 9V batteries

• Display: 3.5" LCD, 2kV max scale

• Test Output: 1kV min, 1mA min, 1.5mA max.

• Terminal: N Female & N Male

• Includes: - Alligator clip adaptor (LP-NF-AC)

- Rugged black nylon carrying case

- Batteries

- Operating Instructions
